Summary

I am a full-stack developer with 5 years of experience working remotely and on-site. I worked on many projects with different clients using React.js and Node.js. I love coding and helping people by finding creative solutions to their problems.

Professional Experience

One Global   Feb. 2022– Present
Full-stack developer, Full-time   Remote, company location: Kuwait
- Developed a new **microservice** that allows non-technical users to buy existing **services**
- Formed the **database** schema, back-end **routes**, and front-end **screens** for the web application

Infinite solution technologies   Sep. 2020–Dec. 2021
Full-stack developer, Full-time   Remote, company location: Canada
- Created a **chat** application for sending and receiving **messages** between influencers and their subscribers
- Established the chat Database schema, the API structure, and **integrated** the app with **Twilio**

Google for Start-ups   Nov. 2019–July 2020
Full-stack developer, Full-time   Remote, company location: London
- Invented admin and chef portals for a system that allows the admin to **hire** and **pay** chefs
- Extended admin features: create and assign **jobs**, create full-detailed menus, add dishes, and add ingredients
- Extended chef **features** assigned jobs, availability, cuisine, and **notifications**

Maskani startup   Jan. 2020–March. 2020
Full-stack developer, Part-time   Gaza-Palestine
- Developed a web application that allows **architects** and **clients** to sign up. The architects can **upload** some designs and the clients can buy and require specific designs from the architects
- Structured the front-end pages, and back-end API and needed helpers to store **uploaded files**

Esmee Fairbairn Foundation   Sep. 2019–Oct. 2019
Full-stack developer, Full-time   Remote, company location: London
- Instituted a form that facilitates the process of **filtering** applications they receive based on specific criteria

Freelancer   Sep. 2018–Dec. 2018, Jun 2019
Back-end developer   Remote, Freelance platform
- Improved an established Indian freelancing platform that allows users to publish **jobs** and **hire** developers
